DETAILED ACTION

Election

Applicant's election of claim 21 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-
(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claim 21 rejected under 35 U.S.C. 102(e) as being anticipated by Holman (US 6,005,776).

Holman discloses an inherent process of providing a high density module (200m) produced by a process comprising the steps of obtaining a circuit board (210) having a top and electrically connecting at least one integrated circuit package (Abstract) having

side surface terminals (240m) being electrically connected to said top of said circuit board through said surface terminal of said integrated circuit package.

Response to Arguments

Applicant's arguments with respect to canceled claims and its subsequent reliance on the preliminary amendment filed September 12, 2002 have been addressed in the office action filed March 13, 2002. Examiner notes to applicant that the preliminary amendment relied on, does not directly reference the current application, thus providing no evidence that the preliminary amendment was filed in the current application. Further, preliminary amendment filed March 13, 2002 is "not of record" and is "no where" in the application aside from the copy submitted by applicant. In regards to the conditional petition, applicant is respectively referred to chapter 1000 of the M.P.E.P to identify where the petition request should be sent; it is improper to request that a response to an office action be treated as a petition, since there are certain requirements that need to be satisfied prior to a petition's consideration. The petition requirements are explained in 37 C.F.R 1.181 (b) along with its fee schedule found in 37 C.F.R 1.17.
